SUMMARY & SKILLS

Senior Software Engineer with 5+ years of experience building scalable cloud-native backend systems. Specialized in JVM ecosystem (Java/Scala/Kotlin) and distributed architectures powering products generating \$500K+ daily revenue.

Languages/Frameworks: Java, Scala, Kotlin, Python, TypeScript, Spring, Ktor, Node.js, Playwright, Jest, Cucumber

Data/Cloud: Kubernetes, Docker, Terraform, PostgreSQL, Redis, Kafka, Apache Spark, Hadoop, Starrocks, GCP, Azure

Tools: Git, GitLab, GitHub, Datadog, Grafana, Prometheus, Pyroscope, Neovim, Agentic Development(OpenCode)

WORK EXPERIENCE

Agoda

Bangkok, Thailand

Senior Software Engineer

Feb 2023 – Present

- Delivered cross-product marketing systems (Hotels, Flights, Activities), including segmented discount engine and promotion code platform, driving extra \$50,000/day incremental bookings.
- Built cross-sell platform bundling hotels and activities; integrated external inventory and Ads system (Google Things To Do, TikTok Go, Meta Pixel) via Apache Spark pipelines, generating \$20,000/day additional revenue from daily bookings.
- Leveraged LLMs to optimize SEO product content, increasing organic traffic and contributing \$10,000/day incremental bookings.
- Led development of a one-click GitLab CI/CD pipeline with Kubernetes and internal IaC, eliminating 3 manual steps by automating tests and release process, enabling canary deployments. Reducing deployment failures by 70%.
- Designed and implemented core backend services for Agoda Activities (inventory, booking workflows, customer service portal) supporting a \$500,000/day revenue product.
- Automated booking status updates and escalation email workflows in customer service portal, reducing manual intervention, human error and lowering operational costs by 40%

ExxonMobil

Bangkok, Thailand

Backend Developer

Apr 2022 – Jan 2023

- Developed secure API and data pipelines integrating legacy SAP systems supporting \$5 billion fuel supply operations.
- Automated Azure CI/CD pipelines using Terraform and Liquibase for Spring Boot microservices

ExxonMobil

Bangkok, Thailand

System Coordinator

Aug 2020 – Mar 2022

- Coordinated Mobile/Web/POS development for Esso/Mobil stations across 5 APAC countries (Thailand, Singapore, Hongkong, Macau, New Zealand)

PROJECTS

RelifNow

Remote

Founding Engineer

Jun 2019 - Sept 2023

- Built telehealth cross platform application connecting 10,000 customers with doctors and pharmacies. Enabling cheap online health consultation and medicine purchasing systems.
- Managed backend logic and cloud infrastructure using ExpressJS/Java Springboot on GCP Kubernetes/Cloud SQL with automated GitHub Actions CI/CD; Contribute on building cross-platform application using Flutter framework to publish to both IOS App store and Android play store.

PUBLICATION

IEEE International Smart Cities Conference (ISC2 2019) Park King: An IoT-based Smart Parking System

- Developed the Chulalongkorn University campus internal parking reservation web app using Express.js, integrating Raspberry Pi devices, presence sensors, and automated parking flaps for real-time space detection and control.

EDUCATION

B.Eng. Information & Communication Engineering

Bangkok, Thailand

International School of Engineering, Chulalongkorn University — GPA 3.24/4.00

Aug 2016 - May 2020

Exchange Program — Information & Communication Engineering

Seoul, South Korea

Sungkyunkwan University, South Korea — GPA 4.20/4.50

Aug 2019 - Dec 2019
